Introduction (Jump to the Executive Summary at the end if you don't want the full monty). This is a review of a book written by James & Hannah Yoseph entitled How statin drugs really lower cholesterol: and kill you one cell at a time (and many thanks to Eric who posted a comment to say that there is a "made easier"™ version of this here.)

Cholesterol (from the Ancient Greek chole- and stereos (solid), followed by the chemical suffix-ol for an alcohol) is an organic molecule. It is a sterol (or modified steroid), a type of lipid molecule, and is biosynthesized by all animal cells, because it is an essential structural component of all animal cell membranes.
