Computational Partial Differential Equations Using

"This is the second edition of a popular tutorial on the numerical solution of partial differential equations (PDEs). It has over 150 exercises and a comparable number of worked-out examples together with computational code. There is an extensive bibliography of 156 references for further reading. It should be of interest and use to researchers and practitioners working in computational mechanics and to students aspiring to enter that field. It should make a good text for graduate-level ...

Introduction to Partial Differential Equations: A Computational Approach Aslak Tveito Ragnar Winther Springer. Preface It is impossible to exaggerate the extent to which modern applied mathematics has been shaped and fueled by the general availability of fast computers with large memories. Their impact on mathematics, both applied and pure, is comparable to the role of the telescopes in ...
