Abstract. If uncontrolled, human influences on the climate system may generate changes that will endanger various aspects of life on Earth. The precise implications of the scientific claims about climate change, and the extent to which they pose dangers to various populations, are becoming intensely debated at many levels in relation to policy.

Cancer represents a significant, and growing, burden on healthcare systems. This is driven, at least in part, by escalating cancer drug budgets. Loss of patent protection on biopharmaceuticals enables the development and production of similar biological medicines, or biosimilars. Biosimilars are currently available for use in oncology in the ...
