3.1 How ggplot works. As we saw in Chapter 1, visualization involves representing your data data using lines or shapes or colors and so on. There is some structured relationship, some mapping, between the variables in your data and their representation in the plot displayed on your screen or on the page.

Data Visualization

A forest plot, also known as a blobbogram, is a graphical display of estimated results from a number of scientific studies addressing the same question, along with the overall results. It was developed for use in medical research as a means of graphically representing a meta-analysis of the results of randomized controlled trials.
